

STUDENT LEADERSHIP TRAINING

**Summer Soto,
Program Manger,
Travis ES**

Project

The Why:

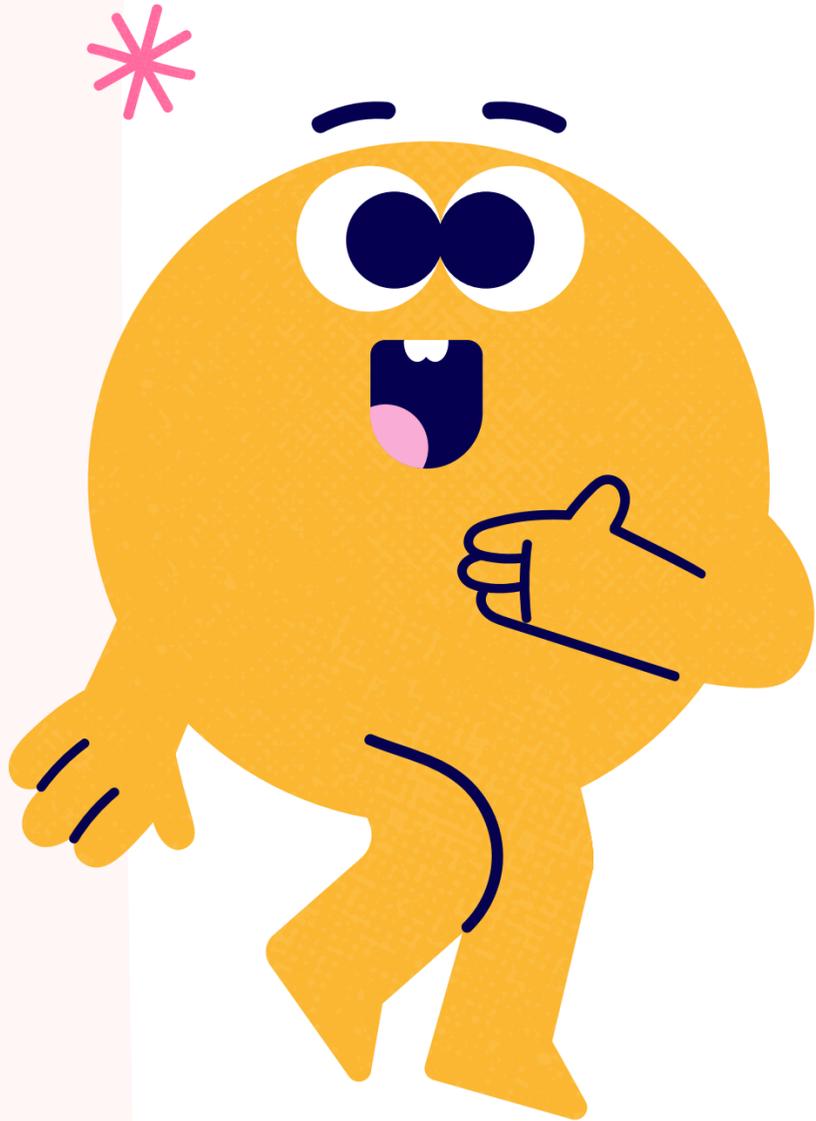

- As a student leadership club we saw an need to increase student participation in meeting. As well as empowering students to be the leaders of the meetings. For that reason we wanted to provided students with a leadership training.

Project Description:

- Our project was focused on the Student Leadership Club for grade levels 2nd-5th. They would participate in a 2hr training to help build their leadership skills. Our goal is for students to lead at least 2 meeting without support of sponsors.

Project Details

30 Student participated in the Student Leadership Training.

Three 2 hours training were provided for 2nd, 3rd, 4th & 5th Grade Students.

Project Summary

After the Leadership Training we saw an increase in confidence within the students. Students did not need the support of the sponsors as much anymore and guided all of their conversation without any support.

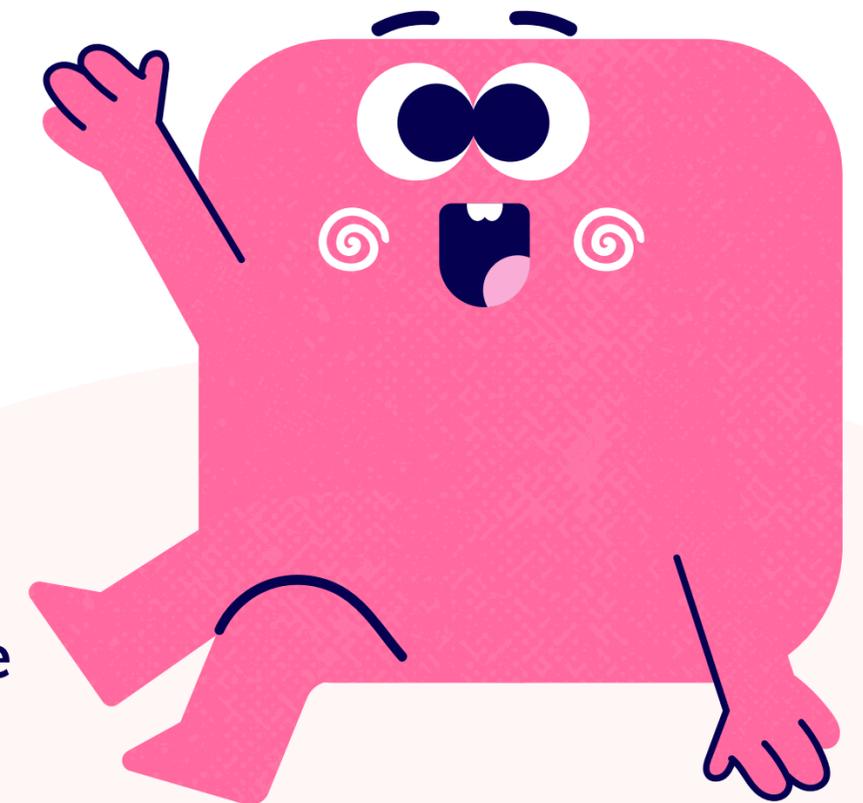

Project Outcomes

Intended Outcome: Two student lead meetings. 

Results: Students lead the last four meetings without the support of their sponsors.

We as well saw an increase in their knowledge of leadership skills through their surveys. Students' response had  changed with a more positive response and understanding of what it is to be a student leader.

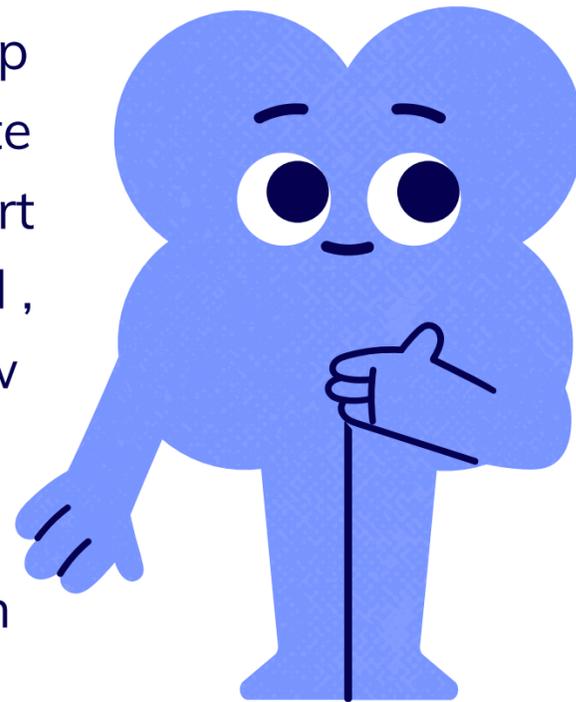

Success & Challenge

Success

The biggest success that we observed was the confidence that we saw grow in the leadership club. Students were able to guide and navigate the leadership meeting with hardly any support from their sponsors. Meetings were student-led, which was our hope for the outcome. We saw that this training helped every one of our members gain a sense of confidence within themselves not only in our meeting but within the student community.

Challenge

A challenge that we faced was finding an appropriate time to conduct training as well as take into consideration the COVID protocols on campus and finding an appropriate space. We overcame the time challenge by looking at a block of days that did not conflict with STAAR testing or conflict with prepping with STAAR. Teachers were also very understanding of the importance of the Leadership training. With overcoming the COVID protocols we did a vast majority of our training outside with the kids. We also split the training up between two days with three sessions to assure that every student was kept safe.

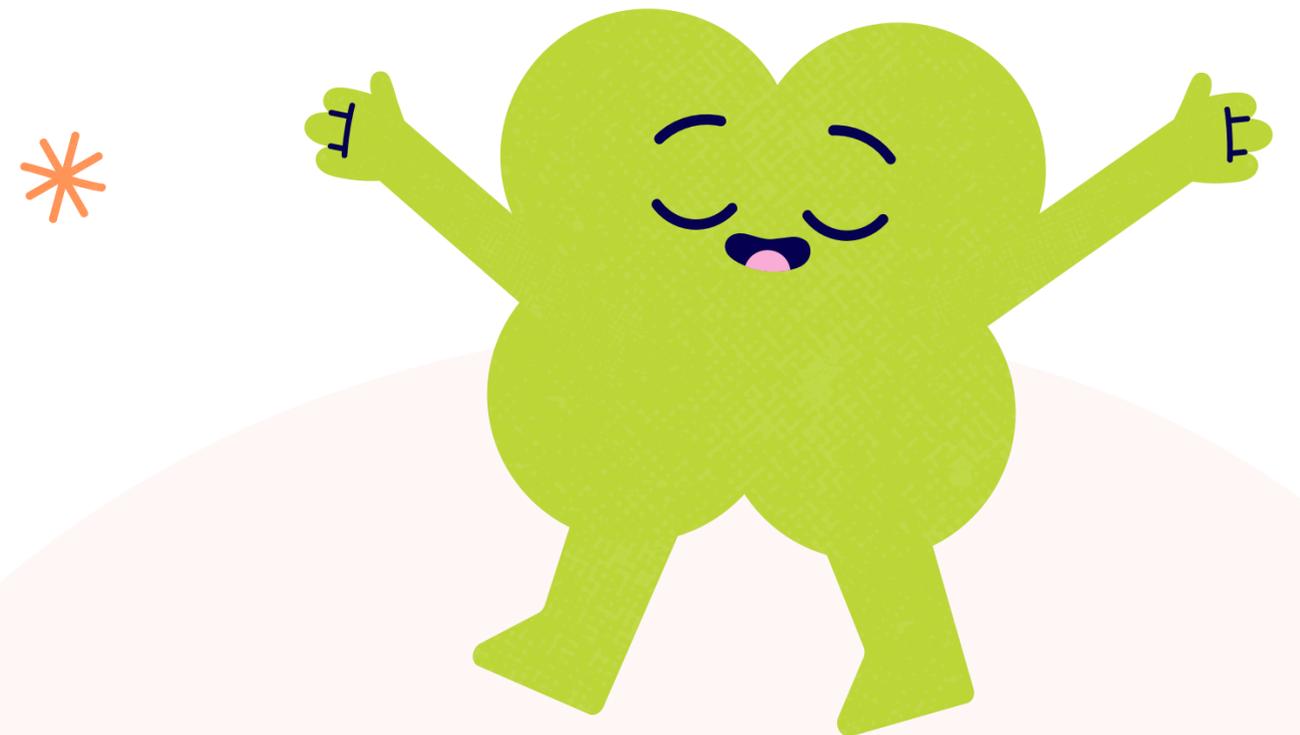

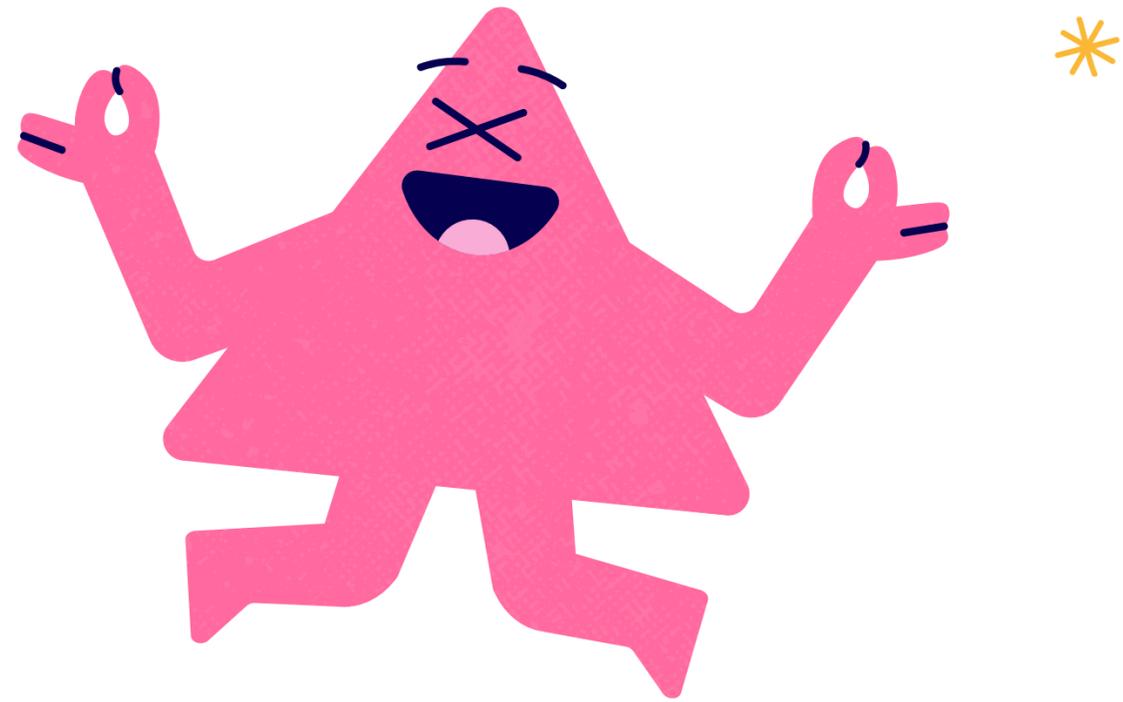

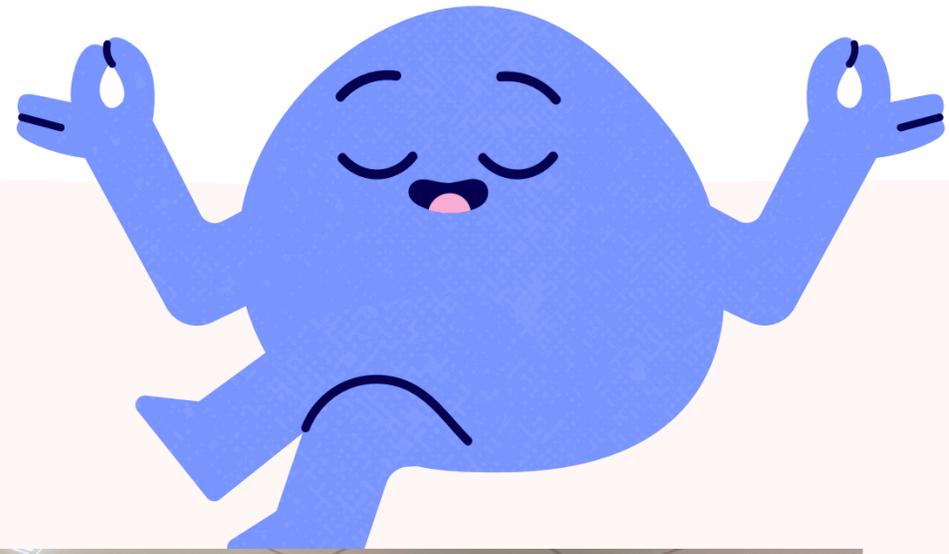

What we Accomplished?

The funds helped us bring out confidence in our students to lead their peers. It provided students with leadership skills they can continue to use throughout their growth .

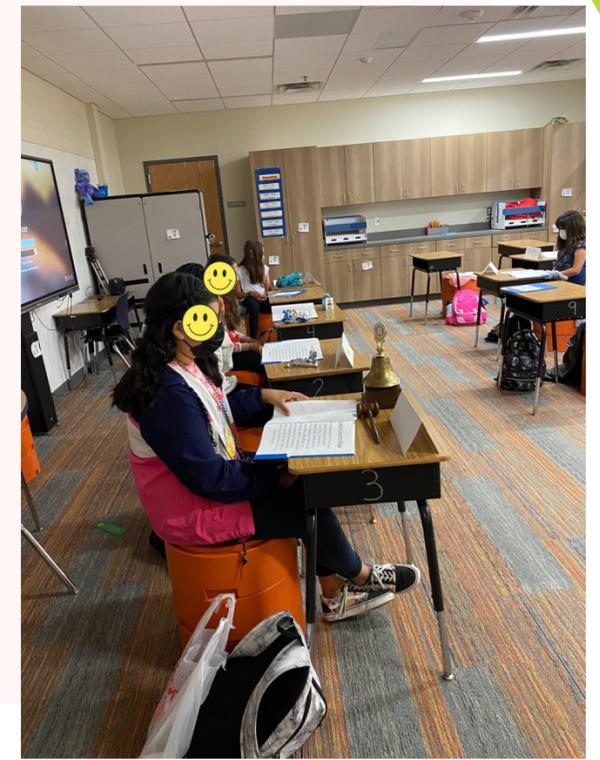

A Hope I have After!

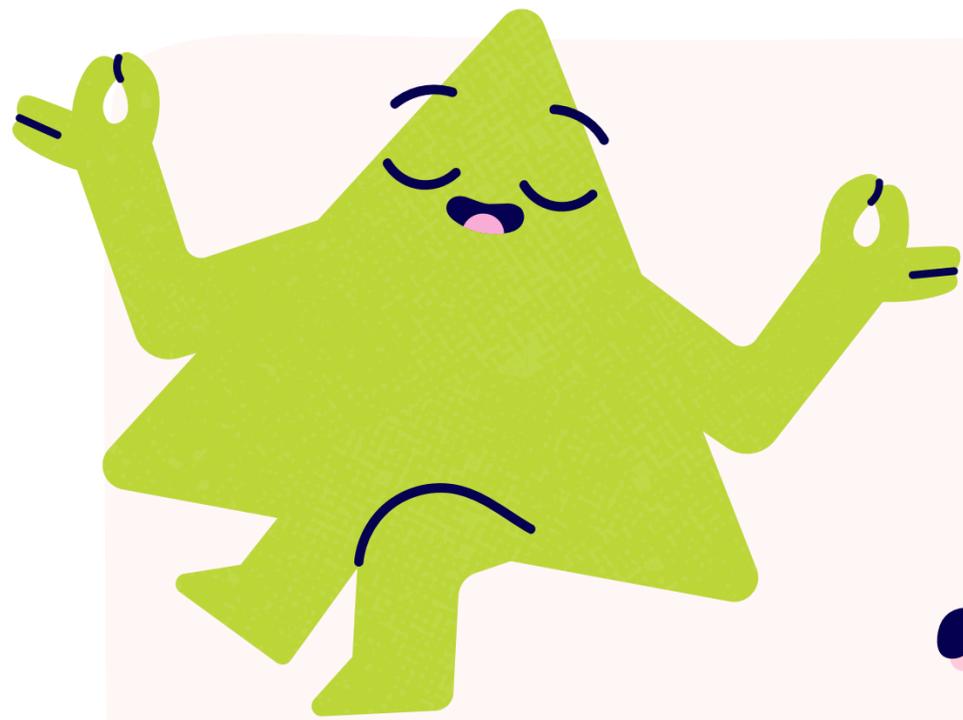

We are hopeful that we will continue to see students leading our Student Leadership Club Meeting. As well as continue to voice their ideas for their peers in and outside of the classroom.
